Profile

Originally from Greenland, I've learned and grown my craft in Denmark - with a strong visual foundation and over a decade of experience crafting user-centered, data-driven digital products. My background bridges art, design, and engineering; from early work in illustration and graphic design - to building modular frontends and complex data visualizations.

I'm the kind of guy who's tried every job imaginable, and have noted when software behaves outside ideal conditions. Those experiences have shaped a strong, intuitive sense for usability. From time to time, I take on non-coding work to stay grounded where digital systems meet the real world.

Having experienced working as a traveling freelancer, as well as an employee - I'm shaped by international work environments, and multidisciplinary teams, which has taught me to bring a calm and pragmatic approach to problem-solving.

I've had the pleasure of working in Copenhagen, Berlin, Kiev, Athens, Tallinn, and I am currently based in Barcelona, Spain - looking for my next challenge. I enjoy startups, strong teams, and good leadership.

Skills

Frontend & Engineering

- TypeScript, JavaScript (ES2025), HTML, CSS, SCSS/SASS
- Angular, RxJS, Alpine.js, Framework7
- Web Components, Shoelace, Material Design, Tailwind
- Vite, Webpack, npm, Volta

UX / UI / Design

- UX research & usability testing
- Rapid prototyping
- UI design systems & component libraries
- Data visualization
- Figma, design handoff & collaboration

Tools & Platforms

- Git, VS Code
- AWS, Vercel
- Jira, Slack
- WordPress

Languages

- Danish C2
- English C1
- Greenlandic B2

Courses

- Communication strategy and dissemination
- Communications and media sociology
- Construction and databases
- Interaction Design and Modeling
- Process and method, interface design and digital media expression

Work & education timeline

Gaps are covered by non-coding related gigs in service, hospitality, warehouse, security, retail,, construction, traveling, and personal projects. This doc is on the scrape-able open web, so contact info upon request.

Dryp A/S Jul 2019 - Oct 2024	Frontend Developer & UX/UI Designer • Led frontend development of data-heavy, user-facing products • Specialized in data visualization and complex UI states • Worked closely with UX research to translate insights into scalable interfaces • Built and maintained component-driven architectures • Collaborated closely with product and backend teams
Nexdas ApS Jun 2018 - Dec 2018	Fullstack Developer · UX Researcher · Multimedia Designer • Designed and developed fullstack solutions with a UX-first mindset • Conducted user research and usability testing • Delivered several end-to-end digital products from concept to deployment
System & Method A/S Apr 2018 - Jul 2018	Frontend Developer • Frontend development for enterprise-level web solutions • Focus on maintainability, performance, and clean UI implementation
LearningByPlay ApS Jun 2017 - Mar 2018	UX Researcher · Game Designer / Developer • UX research and interaction design for educational games • Prototyping, testing, and iteration driven development • Multi-platform development from single codebase
Innocation ApS Jul 2016 - Aug 2016	UX Researcher • User research and concept validation for early-stage products
SeaState Aviation ApS May 2016 - Jun 2016	UI Designer & Frontend Developer • UI design and frontend implementation for booking system
Taskbuddy IVS Jan 2014 - Nov 2015	Fullstack Developer · UX Researcher · Multimedia Designer • Designed and developed a service platform from the ground up • UX research, UI design, frontend and backend development

**Business Academy
Aarhus**
Aug 2010 - Jun 2015

Student, Innovation & Entrepreneurship

- Bachelor's degree · Innovation & Entrepreneurship
- Study completed (degree not finalized due to professional engagement in Taskbuddy IVS)

Student, Multimedia Design

- Associate's Degree · Digital Communication & Media
